Subject: NICE Clinical Guideline NG121 – Intrapartum care for women with existing medical conditions or obstetric complications and their babies

Summary of Contents:
This guideline covers care during labour and birth for women who need extra support because they have a medical condition or complications in their current or previous pregnancy. The guideline also covers women who have had no antenatal care. It aims to improve experiences and outcomes for women and their babies.

Status of Contents:
Action

Implementation:
As per circular. Generally, Clinical Guidelines should be implemented within 12 months of endorsement.

Additional copies:
Dear Colleagues

NICE Clinical Guideline NG121 - Intrapartum care for women with existing medical conditions or obstetric complications and their babies -
https://www.nice.org.uk/guidance/ng121

The Department has recently reviewed the above NICE guidance and has formally endorsed it as applicable in Northern Ireland.

In accordance with the process outlined in circular HSC (SQSD) 3/13, the following actions should be taken (https://www.health-ni.gov.uk/sites/default/files/publications/dhssps/hsc-sqsd-3-13.pdf)

1. HSC Board / PHA
   a. Identify a Professional Lead who will consider the commissioning implications of the Clinical Guideline and co-ordinate with any other relevant commissioning teams. This Lead will identify any areas where regional planning / investment / commissioning are required, or where there is material risk to safety or quality. These will then be actioned immediately through normal commissioning arrangements or through bespoke arrangements reflecting the nature of the issue / risk.
   b. Ensure that relevant guidance is sent to the appropriate Family Practitioners.
   c. Seek positive assurance from the HSC Trusts that the required initial actions have been undertaken within a 3 month period, and that the Guideline has been implemented within a further 9 months (unless otherwise notified by the HSC Trusts).
   d. Where significant investment/ commissioning needs cannot be met within the usual timeframe, agree appropriate arrangements with HSC Trusts. Report to DoH as required at 6 monthly accountability meetings.

2. HSC Trusts
   a. Proceed with targeted dissemination, agree a clinical/management lead to coordinate implementation and consider what has to be done to achieve implementation using a risk based assessment and baseline review as appropriate to support planning. These initial actions should be undertaken within a three month period.
   b. Implement the Guideline within a further 9 months (apart from any elements where significant issues have been raised with the HSC Board/PHA).
   c. Provide positive assurances to the HSC Board that required initial actions have been taken within the 3 month planning period and that the Guideline has been implemented within a further 9 months, where appropriate.
   d. Where significant investment/ commissioning needs cannot be met within the usual timeframe, notify the HSC Board/PHA at the earliest opportunity through the bi-monthly director level meetings and agree appropriate arrangements with them to achieve implementation.

3. RQIA
   a. Disseminate the Guideline to the independent sector as appropriate.

4. HSC Special Agencies and NDPBs
   a. Take account of this Guideline in training and other developments as appropriate.
To inform the planning process, please find attached details from the Departmental review. You should consider and take account of other relevant Departmental policies and strategies in your planning, as well as any legislative / policy caveats identified in the course of the Departmental review.

Dr Paddy Woods
Deputy Chief Medical Officer
## Appendix 1

The guideline includes recommendations on:

- heart disease, bleeding disorders and subarachnoid haemorrhage
- asthma, long-term systemic steroids and obesity
- acute kidney injury and chronic kidney disease
- sepsis and intrapartum haemorrhage
- previous caesarean section and labour after 42 weeks
- small-for-gestational-age baby and large-for-gestational-age baby
- no antenatal care

**NICE has also produced Clinical Guideline CG190 - Intrapartum care for healthy women and babies (endorsed by DoH in January 2015) -**

<td>Legislative / policy caveats</td>
<td>This advice does not override or replace the individual responsibility of health professionals to make appropriate decisions in the circumstances of their individual patients, in consultation with the patient and/or guardian or carer. This would, for example, include situations where individual patients have other conditions or complications that need to be taken into account in determining whether the NICE guidance is fully appropriate in their case. Where this guidance indicates that informed consent should be obtained and documented, the DoH guidance Reference Guide to Consent for Examination, Treatment or Care (2003), gives advice on the law concerning consent to intervention. Available at: <a href="https://www.health-ni.gov.uk/articles/consent-examination-treatment-or-care">https://www.health-ni.gov.uk/articles/consent-examination-treatment-or-care</a></td>
