

Emma Giddings
Network Manager

8th March 2019

Scope of Network

What is a Network?

- Sharing learning & ideas
- New solutions
- Talent & knowledge
- Building Community
- Innovate
- Embed change
- **Quality Improvement**

“Networks provide whole systems of care and a means of achieving change across **professional** and **organisational** boundaries”

The Health Foundation

By working together we can:

Reduce any assumptions

Increase our learning from each other

Learn about the whole system

Think about the system in new ways

Nursing & Allied Health Professional Sub-group

To establish a group of expert nursing and AHPs representatives to contribute to the organisation of trauma care in NI as a sub-group of the Network's Clinical Advisory Group.

To contribute to the development of protocols and guidance for trauma care using evidence-based practice in line with national standards.

To contribute to the development of regional principles and standards for trauma nursing and patient care.

To provide advice to the network CAG regarding relevant nursing and AHP matters and promote patient centred care.

To provide a collegiate approach to sharing examples of good practice and addressing common issues.

To identify training needs and make recommendations to HSC Trusts on appropriate education and training for nursing and AHP colleagues involved in the care of trauma patients.
