

## **Integrated Care Partnerships – animation script**

Right now, change is happening.

More people are living longer.

That's more people with complex health and social care needs and a greater demand on resources.

Without change now, the system won't continue to cope.

We know that more joined up care will support that change.

Here's what we're doing to help:

- 17 Integrated Care Partnerships (ICPs) across Northern Ireland;
- Redesigning services and working more closely together to keep people well in local communities;
- Making sure each person gets the care they need in the right place at the right time;
- Sharing information and thinking ahead to plan care around the individual;
- Focusing on prevention and managing conditions to stop a problem becoming an emergency;
- Staying out of hospital unless absolutely necessary and coordinating care in the community.

Right now, change is happening.

People are getting better care.

Outcomes and patient experiences are improving.
