“First time ever all staff members got the flu vaccine.... We were able to convince one staff member that it couldn’t give you the flu!!”
“As the group were in a rural area, we advised them to check on neighbours and to keep warm. ...we gave out ‘Hearty Soup’ recipe leaflets.”

“We found the service was an excellent way to educate our patients on the mass of services available to them to help them and their families keep well this winter.”

“On one occasion, this service allowed our pharmacist to identify a coronary event which may have otherwise gone unnoticed.”

“Gave a presentation on the flu virus and the importance of being vaccinated. ... participants now planned to get vaccinated.”

“We ran a demonstration class with 7-8 year olds discussing when and how to wash your hands....feedback has been great and now something we may run annually.”

“A 4 year old boy was prescribed 2 inhalers and prone to chest infections.... Due to his fear of needles his mother was reluctant to take him for the flu vaccine.... We were able to advise the mother that he was eligible for the inhaled vaccine and thus no needle would be necessary. We stressed the importance of receiving the vaccine every year.”
